What is this product?

Type: Investor shares of an Open-Ended Registered Alternative Investment Fund, as provided in the Alternative Investment Fund Law, or in any other law which replaces or amends it. The RAIF is not authorised by CySEC and the registration into the RAIF's Register is not equivalent to authorisation by CySEC.

Term: The Fund is set up for an indefinite period but may be liquidated in accordance with section 18 of its Prospectus.

Objectives: The investment objective of the Fund is to provide attractive, long-term investment returns to investors by investing, in a diversified portfolio of private equity funds, diversified across various strategies, industries, geographies, managers, vintage and transaction types. Investments in private equity funds should generally consist at least 60% of the Fund's assets. In order to supplement its returns and enhance diversification, the Fund may also invest in any other liquid or illiquid asset class or financial instrument deemed by the AIFM to be in line with the Fund's investment objective. The screening methodology will focus on managers who have demonstrated their ability to identify companies with commercial growth potential, select attractively priced investment opportunities, work actively with and improve portfolio companies and generate value, protect investors' rights, maintain a stable internal organization and develop open and honest relationships with investors. The screening methodology will also focus on other qualitative and quantitative measures for the selection of funds, including but not limited to the Internal Rate of Return, the return correlations of funds and their expected cash flows, the

consistency of past returns in relation to the overall market direction, the Alpha generating ability over different time periods, the strategy implementation methodologies, the Manager Rating, the manager's assets under management and the ability and track record of the persons responsible for the investment process of the fund and/or its manager. The Fund is actively managed without any benchmark reference.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose value because of movements in the markets or because we are not able to pay you. We have classified this product as risk class 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. For a full disclosure of risks entailed by investing in this Product please refer to the "Risk Factors" section of its Prospectus.

Performance Scenarios

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 15 years. Markets could develop very differently in the future. What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: 10 years				
Example Investment: USD 10,000				
Scenarios		If you exit after		
		1 year	5 years	10 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year you will get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario;
- USD 10,000 is invested.

Scenarios	If you exit after 1 year	If you exit after 5 years	If you exit after 10 years
Total Costs	22	174	463
Annual Cost Impact*	0.2%	0.2%	0.2%

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.6% before costs and 7.4% after costs.
